

PRODUCT SHEET - BI & ANALYTICS ORCHESTRATION

Do you need a right-hand, orchestrating deliveries across vendors and technology teams?

You play a key role in the definition and the execution of the BI & Analytic agenda in your company.

Due to the nature of modern BI & Analytics, you are expected to coordinate and stay on top of multiple platforms, technologies, solutions, suppliers, resources, integrations, and stakeholders.

In fact, you are in everybody's shooting line and you are holding all tows, all the while managing your own department, budgets, resources, etc.

You risk becoming a bottleneck, and the time and energy you spend on holding things together impacts the actual deliveries towards your own BI & Analytics agenda as well as to your management.

Approxima's solution

We will assist you in keeping the overview of all customer/supplier links of your products, internally and externally, and help you manage the multiple-ways communication and coordination across technologies, suppliers, resources and stakeholders.

We have been in your shoes ourselves, and though we understand that this is something you can do as well, we know from experience that it is time-consuming and keeps you from focusing on what really matters.

In short, you delegate some of your most cumbersome and time-consuming tasks to a shadow BI assistant manager whose role is to assist you in your coordination tasks.

Instead of managing multiple vendors, you manage only one, who manages, coordinates and orchestrates on your behalf.

Your Benefit and Business Value

You get an experienced, real partner and personalized assistance with one of the most time-consuming and cumbersome tasks on your duty list: managing and coordinating vendors and multiple technology deliveries. Instead, you can focus more on what really matters to you and your results. In short, a right-hand with the relevant experience who helps you succeed.

You should expect:

- Increased possibility and time to focus on what really makes you succeed
- Vendors and technology suppliers managed on your behalf
- Optimization of cross-technologies dependent deliveries
